

Case Face Sheet

Information on the Case and its Participants, Access and IA Involvement and OHC Placements For Case ID 1234567

Access

All documented Access reports are summarized by whether they were screened in or out, Alternative or Traditional Response, and Service or CPS Reports. The Access history is also detailed within a table. Some Access reports will appear on multiple rows as the report displays one row per allegation, per alleged victim, and per alleged maltreater relationship. If the case has multiple Access reports, the report differentiates the reports by color. The county of the Access report is noted to be the county assigned to the Access screening supervisor. The report date and response time is also provided.

Initial Assessment

All documented I.A.s are summarized by whether they were Alternative or Traditional Response, substantiated or services needed, and safe or unsafe. The detailed lists of Initial Assessments are likewise organized to provide one row per allegation, per alleged victim, and per alleged maltreater. Color blocks denote different Initial Assessments. The table also states the IA approval date, county, allegation finding, alleged maltreater allegation finding, and safety decision. Also provided are the I.A. Disposition and 'Family Characteristics' from the most-recent completed I.A.

Case History

Summary information of the case history includes the date the case was first opened and most recently opened. The information provided on a participant's documented disabilities or documented AODA issues is taken from the individual's 'Characteristics' page of eWiSACWIS. The number of child participants is determined by date of birth; if DOB is unavailable, an individual will not be identified as a child. The 'current participants under county responsibility' are the case participants who have the 'Rsp' flag checked within the list of active participants. Likewise, the 'current household members' are the active case participants who have the 'Hshld' flag checked.

Participants Under County Responsibility

Every participant under county responsibility is listed in this report, starting with the Reference Person, and then proceeds from oldest to youngest person.

Limitations of data before 2007

Please note that some data prior to 2007 will not be available. For example:

- A list of every Access Report received after 2000 is provided in the report, depending upon when the county in question implemented eWiSACWIS. The latest county implementation of eWiSACWIS was 2005.
- Access Service Reports are excluded if their documentation states they are 'missing in error'.
- A list of every Initial Assessment completed after 2000 is provided; however, safety findings on these assessments are available as of 2006. Additionally, Initial Assessments completed before 2007 are excluded if their closure reason was 'Other'.
